PROFILE

I am a student at YouCode Safi, UM6P, specializing in Full Stack Development. Passionate about information technology, I possess strong skills in programming and project management. As a Scrum Master within an Agile framework, I lead teams to develop web applications, fostering collaboration and innovation. Dynamic and motivated, I am eager to actively contribute to innovative projects within multidisciplinary teams.

🎓 DIPLOMA AND CERTIFICATE

- **Full Stack Web Developer | YouCode - | UM6P**   2024 - In Progress

- **Faculty of Science and Technology Settat |**   2023 - 2024
  BACHELOR'S IN COMPUTER ENGINEERING

- **Faculty of Science and Technology, Settat |** 2021 - 2023
  DEUST IN MATHEMATICS, COMPUTER SCIENCE, AND PHYSICS

- **Faculté des sciences et technique Errachidia |** 2020 - 2021
  DEUST IN MATHEMATICS, COMPUTER SCIENCE, AND PHYSICS

- **Hassan II Qualifying High School- Laâyoune | 2019- 2020**
  BACCALAUREATE IN MATHEMATICAL SCIENCES A

- **Alison Certificate in Linux Network Administration**

- **Certification SQL (Avancé) – HackerRank**

- **Internship (PFE): At the offices of Big Master Sarl in Casablanca**

Developed a web application for an alert center to detect fraud and non-compliance issues among Intelcia clients.
Technologies Used :
H**tml5, CSS3, PHP, JQuery, Ajax, PHPMyadmin, SQL, GOOGLE Charts, Formsubmit, Formspree, MVC, LDAP, JSON, JavaScript.**

- **Remote Internship: At the client company, Intelcia, in Casablanca**

Created a Netflix-inspired training platform for Intelcia, enabling new agents to access the company's previously delivered training content.

ACADEMIC PROJECTS

- Programmed a Motorola 6809 microprocessor simulator in Java, creating a robust emulation environment to simplify testing, development, and learning of software designed for this microprocessor

- Developed an Online Recruitment Application using HTML, CSS, JavaScript, Bootstrap, PHP, and MySQL

- Developed a real-time multi-room chat application using Socket.IO and Node.js, implementing WebSocket communication for instant messaging across different chat rooms. Integrated additional frameworks for enhanced features including user authentication and message persistence

- Conversion of numbers between different numeral systems and representation of numbers with fixed and floating-point precision using the C programming language.

- Task Management System — To-Do List
  Developed a task management application using HTML, Tailwind, and JavaScript, allowing users to add, search, filter, and prioritize tasks. The application is responsive and provides an intuitive and dynamic interface.
